1.1.4 Documentation

ID: XXX

Component: MOSKitt4ME
Service name: Documentation
Domain: Open Source
Partner: UPV

Actions / Dates

Date	Action
16/05/2012	We have uploaded four papers published in different conferences of the software engineering field, where the research approach that underpins MOSKitt4ME is introduced. In addition, we have uploaded a Master Thesis performed in the UPV that overcomes the complete development of MOSKitt4ME. Finally we have uploaded a MOSKittt4ME technical report.

Description:
All the uploaded documentation is written in English. This documentation introduces both the research that underpins MOSKitt4ME and the technical information about the MOSKitt4ME software infrastructure. The oldest document dates from 2010, and the newest from 2012.

Conclusions:
- Documentation describes how to integrate Eclipse plugins into the MOSKitt platform using the MOSKitt4ME tool. From the OPEES point of view, these plugins can be seen as components to be integrated for supporting a particular software development method.
