05/11/2012	MOSkitt4ME was registered at the UPV registry system

Description:

Software in Spain is ruled by the RDL 1/1996 intellectual property law [1] and can only be patented under very specific conditions, which are not satisfied by MOSkitt4ME. Copyright arise from the very beginning of the creation and therefore, it is not necessary to start any type of process of industrial protection. However, to guarantee the proof in case of copy or fraudulent usage, and also with promotional purposes, the Universidad Politécnica de Valencia (UPV) has a registry system with all his technological offer (capacities, results, and software) called CARTA. In this respect, we have proceeded with the registration of MOSKitt4ME in such system, being the authors of this software Victoria Torres, Vicente Pelechano, Manoli Albert y Mario Cervera.

According to the sustainable economy law 2/2011 (art. 54) [2] the ownership and the running rights of the results of the research, development and innovation activities as consequence of the performance of the tasks that are own to them, by the research personnel from the Universities, belongs to the UPV. The MOSKitt4ME authors, according to what is said in the science, technology and innovation law 14/2011, will have the right to participate in the benefits obtained by the UPV as consequence from the eventual exploitation of the results of the research, development or innovation activities where it had participated. The percentages upon these benefits are regulated in the internal normative of the UPV about patents and intellectual property.
