November 7, 2007

Move from Tools to Technology

- In December Mylyn had a successful 1.0 release and left incubation status
- Communities have grown rapidly since, included with EPP as part of 2.0 release
- Best home was determined to be the Tools project
 - <http://dev.eclipse.org/mhonarc/lists/tools-pmc/msg00158.html>
- Move was done as part of the Mylar to Mylyn rename

- Details in porting guide:
http://wiki.eclipse.org/Mylyn_Porting_Guide

- No braking changes

- Each has multiple clients

Tool Usability

- Maturity
 - Constant stream of stable releases, part of Europa release train
 - Bundled as part of EPP
 - Committers work from HEAD, contributors from weekly builds, community from milestone releases
- User feedback says it best
 - “..arguably the most productivity-enhancing idea since background compilation and all of the things that enables (namely refactoring and syntax highlighting). I just don't know how I ever was able to read and understand the Eclipse sources (or the sources of other large projects I've worked on) before Mylar, it's just that good.” (David Orme)
 - “I would like to commend you on this very good tool. It has increased my productivity by 3 folds - no kidding...” (Deepak Devje)

Architectural Issues

- No changes since 2.0

End-of-Life

- No changes since 2.0

Bugzilla

- 462 bugs resolved since 2.0

Standards (no changes since 2.0)

- Mylyn requires J2SE 1.5, provides warning if installed on 1.4
 - Key driver for using 1.5 was the benefits of generics-aware APIs

 - <http://www.eclipse.org/articles/Article-Accessibility/index.html>
- Follow the User Interface Guidelines
