Developers

This table lists all patch attachments submitted by non-committers in bugs where the patches were applied. These bugs are marked with the 'contributed' keyword. The table shows the Milestone which is the release where these patches first appeared, as well as the size in bytes of the patch.

Number of contributions: 755

Third Party Software

The C99 and UPC plugins features include the LPG parser generator version 1.1. IPzilla 1468 approved its entry. It is under the EPL license and is included directly out of Orbit by the builds for these features.
