

CloudFree Name & Scope Change

February 6, 2009

Website: <http://www.eclipse.org/cloudfree/>
Newsgroup: <news://news.eclipse.org/eclipse.cloudfree>

Name Change

- Remove association to cloud computing that people think when hearing “CloudFree”
- Change name to “Gyrex”
- Change short name to “gyrex”
- This affects everything
 - Bugzilla
 - Website
 - Mailing list
 - Newsgroup
 - CVS
 - Java package name
- See [bug 262232](#) for discussions that lead to the new name

Scope Changes

- Remove focus on “(e-)commerce”
 - Not enough community interest
- Focus on the core elements of CloudFree:
 - Infrastructure, components, and tools that will support development, provisioning and operation of scalable server solutions.
- Drop “Inventory, Customer & Order Service” from the list of project components
- Provide an exemplary application/service which demonstrates scalability and extensibility

Scope Changes

- Concentrate on set of four well defined and self-contained components
 - Contextual Runtime
 - Clustering & Monitoring Service
 - Admin Service
 - Exemplary Web Application

Out of Scope

- We will not develop a fully-fledged JavaEE application server.
- Running within existing containers will be supported but we will not develop vendor-specific integrations.

Contact & Resources

- Newsgroup preferred
