Eclipse Move Review Docuware: Technology OHF Components (SAT and DK) to Eclipse Equinox RT

Submitted by:

Rubin Zhou – Device Kit Committer

Simon Archer – Service Activator Toolkit Committer

November 25, 2009

Move Request

- This move review package contains details requesting the approval to move the following two components from the Eclipse Technology Open Healthcare Framework (OHF) project to the Eclipse Equinox Runtime (RT) project:

  – SODA Device Kit (DK)   at   org.eclipse.soda.dk

  – SODA Service Activator Toolkit (SAT) at org.eclipse.soda.sat

Background

- SODA is an existing project which provides for a SOA approach to integration of real-world devices such as sensors and actuators.

- Was incubated in OHF (Open Healthcare Framework), part of the Eclipse Technology Project

- The reason for this move request is the fact that OHF is being sunset and the domain specific components are moving to Open Health Tools (OHT).
  - See www.openhealthtools.org for more information.

Move Plan

For the SODA components, which are not specific to healthcare, the proposal is to move them to the Equinox RT incubator project.

The proposed new locations:
dev.eclipse.org:/cvsroot/rt
      org.eclipse.equinox/incubator/soda/dk/...
      org.eclipse.equinox/incubator/soda/sat/...

This proposed directory structure supports the current structure and will not require any major updating of build scripts.

All un-resolved bugzillas will be moved or copied into new bugzillas under the appropriate Product and Components.

SODA web page (http://www.eclipse.org/ohf/components/soda/) will need to be updated with new links.

Move Plan cont.

Request that the following active committers move with the projects to continue development:
- SODA Device Kit (DK)
    - Ruibin Zhou (rzhou)
    - Aldo Eisma (aeisma)
    - David Lavin (dlavin)

- SODA Service Activator Toolkit (SAT)
    - Simon Archer (sarcher)

-IP Log Review Approved by Sharon Corbett on 11/20/2009.
    - http://www.eclipse.org/ohf/project-info/iplog.html
    -Approved IP Log PDF will be attached separately.

-Project plan:
http://www.eclipse.org/projects/project-plan.php?projectid=technology.ohf
