

SOA Tools Release Review

- Significant Features in this release
 - *Enhanced BPMN Modeler*
 - *Ready for JAX-WS and SCA/Java Services*
 - *WTP Server Framework Integration*
- APIs at pre-1.0 stage
 - *More feedback required from adopters*
- Community Diversity
 - *Active committers from IONA, Intalio, Sybase*
- Intellectual Property
 - *All new code provided under EPL 1.0*
 - *All 3rd-party (non-EPL) approved by EMO*
- No EOL issues

Significant Features

- Extensions of BPMN Modeler
 - <http://www.eclipse.org/stp/bpmn/>
- Java Annotations Validator
 - <http://www.eclipse.org/stp/sc/RuleBasedXMLValidator.doc>
 - <http://www.eclipse.org/stp/sc/RuleBasedAnnotationValidator.doc>
- JAX-WS Development Support
- Initial SCA/Java Development Support
 - http://wiki.eclipse.org/index.php/SCA_Java_support_in_STP

Significant Features

- WTP Server Framework Integration
 - *Adapts WTP Server definitions to STP deployment profiles*
 - *Allows re-use of existing single-server approaches in the STP multi-server capability*

APIs

- STP released as a version pre-1.0
 - *Need more feedback from consumers on APIs and extension points*
 - *This is starting to come in, more releases required to make sure the APIs meet the requirements*

Community

- Community diversity includes active developers from Intalio, IONA, Sybase
- Total 11 active committers and 2 contributors from 5 countries
 - *three new committers in the past quarter*
- Promoting diversity by soliciting contributions from organizations in the SOA industry

IP Clearances

- Contributions
 - *All new code provided under EPL 1.0*
 - *Any third-party components (non-EPL) approved by EMO*
 - *EMO completed due diligence on all components*
- STP 0.6.0 provided under EPL
 - *about.html and licenses are updated*
- STP Committers
 - *have completed necessary paperwork*
 - *approved by PMC/EMO*

Thanks!
