Subversive IP Log

Committers

Active Committers

Committer name	Unix login name	Active since	Organization
Alexei Goncharov	agoncharo	December 2007	Polarion Software
Alexander Gurov	agurov	Initial committer	Polarion Software
Sergiy Logvin	slogvin	Initial committer	Polarion Software
Igor Vinnykov	ivinnykov	Initial committer	Polarion Software

Inactive Committers

Committer name	Unix login name	Inactive since
Michal Dobisek	mdobisek	May 2007
Alexey Mikoyan	amikoyan	March 2007

Contributors

Bug #	Contributor's name	Contribution size	Committer	Description
[210272](#)	Alexei Goncharov	Small	Alexander Gurov	Compare after refactoring problems
[210387](#)	Alexei Goncharov	Small	Alexander Gurov	Error while representing the remote content of the folder with incorrect externals property
[210797](#)	Alexei Goncharov	Small	Alexander Gurov	Spellchecking support in Commit dialog and Add/edit commit template is absent
[217561](#)	Thomas Champagne	Small	Alexei Goncharov	Additional date formats for label decorations

Project Distribution (from eclipse.org)

Subversive project has no third-party libraries usage except dependency on external Subversion client library.

Name including version	IPZilla #	State	Location	License	Usage
Initial code contribution	1542	approved_all_projects	/trunk	EPL	Initial code contribution

Exempt Pre-Requisite Dependency (distributed from polarion.org)

Subversion/JavaHL is Subversion client library and was approved as exempt pre-requisite by EMO post in the newsgroup. All libraries listed here are part of Subversion/JavaHL 1.5 or its required third-party dependencies.

Library	Name	License	Comment
svnjavahl.jar libsvn_client-1.dll libsvn_delta-1.dll libsvn_diff-1.dll libsvn_fs-1.dll libsvn_ra-1.dll libsvn_repos-1.dll libsvn_subr-1.dll libsvn_wc-1.dll libsvnjavahl-1.dll	Subversion/JavaHL 1.5	BSD-style license	Dynamically linked library. JavaHL provides access to Subversion infrastructure. svnjavahl.jar is a Java interface, which connected with native libraries through JNI.
dbghelp.dll	DbgHelp	License isn't clear as well as that purpose of this library usage. Maybe it's related with a fact that SVN 1.5 is still in beta phase and this library will be removed from the release	Dynamically linked library. This library is a part of Windows OS, so it isn't clear why it was included into JavaHL distribution. Maybe it will be excluded from release.
intl3_svn.dll	Libintl 0.14.1 (patched)	GNU Lesser General Public License	Dynamically linked library. JavaHL includes patched version of Libintl. Original version of this library is a part of GnuWin32 project. This library used for native language support.
libapr-1.dll libaprutil-1.dll	Apache Portable Runtime 1.2.x	Apache License, version 2	Dynamically linked library. APR provides abstraction of operating-system level services such as file and network I/O, memory management, etc.
libdb44.dll	Berkley DB 4.4	BSD-style license	Dynamically linked library. This library used to work with database-based implementation of storage
libeay32.dll ssleay32.dll	OpenSSL 0.9.8g	BSD-style license	Dynamically linked library. OpenSSL allows to use SSL-encrypted connections.
	Zlib 1.2.3	BSD-style license	Statically linked with Subversion binaries. Used for compression of communication streams.
	Neon 0.28	GNU Lesser General Public License	Statically linked with Subversion binaries. This library provides HTTP and WebDAV protocols implementation
	Serf 0.1.2	Apache License, version 2	Statically linked with Subversion binaries. This library provides HTTP and WebDAV protocols implementation

Can-Work-With Dependency (distributed from polarion.org)

SVNKit is alternative Subversion client library and was approved as can-work-with dependency. All libraries listed here are part of SVNKit or its required third-party dependencies.

Library	Name	License	Comment
svnkit.jar	SVNKit 1.5	License for open-source projects License for commercial projects	Pure Java implementation of Subversion client
svnkit-javahl.jar	JavaHL Java Interfaces 1.5	BSD-style license	Subversion Java interface abstraction taken from Subversion project
jna.jar	Java Native Access	LGPL 2.1	This library provides access to native shared libraries
ganymed.jar	Ganymed SSH2	BSD-style license	Ganymed SSH-2 library used to support the svn+ssh protocol

Project Status: Incubation
