# 1. Introduction

This Guide covers Virgo Snaps and assumes you are already familiar with OSGi and Virgo.

## 1.1 Requirements

Snap Snap

## 1.2 Concepts

Snap Snap

## 2. Installing Virgo Snaps

### 2.1 Prerequisites

The Virgo Snaps, or VS for short, requires Virgo Tomcat Server and Java SE 6 or later to be installed. Java is available from <http://www.java.com/> and elsewhere. Virgo Tomcat Server is available from [here](#).

### 2.2 Installing from the ZIP Download

#### Downloading the ZIP file

Virgo Snaps is distributed as a ZIP file. This can be downloaded from [here](#).

#### Downloading the ZIP file

Once the zip is unpacked you will find several things inside including a copy of this documentation in the `docs` folder.

### 2.3 Post-installation steps
